

### Real Time GPS Vehicle Tracking Systems made affordable at GPS discounter

GPS discounter's Real Time vehicle tracking systems allow you to locate vehicle's , persons, assets, fleets and more by logging on to a website at any time of the day or night.

Once connected to the website with your private tracking account you will be able to view realtime information on the current location, speed and direction of travel of one or more of your devices installed in vehicles or carried by your field workers or family. This location based information will be displayed on maps to show you exact GPS locations to within about 15 meters. Additionally a set of tools is available to inform you when GPS tracking device cross geo-fences or when speeding. A variety of GPS tracking devices can be monitored and you are informed with their current GPS tracks or review their historical ones within the glimpse of an eye.
